

Pension Estimate Table: Tier 2 Regular

How to use this table

1. Find your Final Rate of Earnings in the first column.
2. Find your years of service credit (top line).
3. Your estimated pension at age 67 or older will be the amount shown at the point where your earnings line and service column intersect.

Example: 25 years of service credit and Final Rate of Earnings of \$2,000 will provide an IMRF pension of \$900 per month at age 67 or older.

Also, by signing into Member Access at www.imrf.org, you can calculate an estimate using your actual IMRF member information.

Members within five years of retirement should request a formal pension estimate by calling an IMRF Member Services Representative at 1-800-ASK-IMRF (275-4673).

Social Security benefits are in addition to the figures shown below.

Final Rate of Earnings (FRE)

Under the Regular Tier 2 plan, your Final Rate of Earnings (FRE) is your highest total earnings during any 96 consecutive months within your last 10 years of IMRF service divided by 96. Usually, this is the average of the last 96 months of service.

YEARS OF TIER 2 REGULAR SERVICE CREDIT
