Executive Summary of Investment Performance

As of March 31, 2022

IMRF Performance Summary

- The Illinois Municipal Retirement Fund (“IMRF”) ended March 2022 with a market value of \$54.1 billion, down for the quarter by approximately \$2.7 billion. Market volatility associated with the Russia-Ukraine conflict and interest rate hikes intended to tame inflation provided a challenging environment for growth and defensive assets
- IMRF underperformed the benchmark during the quarter, returning -4.44% versus -2.99% for the Total Fund Benchmark. This was the first quarter of underperformance after 7 straight quarters of outperformance
 - Through the end of March 2022, IMRF returned 7.47% versus its benchmark of 7.37% for the one-year period.
- The U.S. Equity Portfolio underperformed the benchmark during the quarter, returning -6.22% versus -5.01%. In aggregate, investment manager performance in Large Cap Growth was the largest contributor to relative underperformance. Value outperformed growth considerably during the first quarter and portfolio shifts made last year and this year away from growth helped mitigate further losses.
 - Over the trailing one-year, the U.S. Equity portfolio underperformed the benchmark, returning 9.27% versus 12.24%.
- The International Equity Portfolio underperformed the benchmark during the first quarter, returning -7.76% versus -5.44%. Investment manager under performance in Large Cap Growth, Large Cap Core, and Emerging Markets were the largest detractors for the quarter.
 - Emerging markets as a whole were challenged as the Russia\Ukraine conflict impacted other regions and drove up energy prices, higher quality companies and underweights to energy names were headwinds that contributed to underperformance
 - Over the trailing one-year, the International Equity portfolio underperformed the benchmark, returning -2.51% versus -1.48%.
- The Fixed Income Portfolio outperformed the benchmark during the quarter, returning -5.54% versus -5.93%. Investment manager performance was mixed, however a structural tilt to less rate sensitive assets provide some protection as rates increased in the quarter
 - During the trailing one-year period, the Fixed Income portfolio outperformed the benchmark, returning -3.40% versus -4.15%.
- As of March quarter-end, Domestic Equity was 5.9% over its target. The current Statement of Investment Policy states that when actual allocations of the asset class differ by more than four percentage points from the policy target, a recommendation for rebalancing will be made to the Board of Trustees. At this time, IMRF is implementing the new asset allocation that was approved by the Board at the February 2022 meeting.

Market Commentary

U.S. Equity

The U.S. stock market was down -4.9% for the first quarter of 2022. Sector performance was mixed as Energy (+39.0%) and Utilities (+4.8%) were up, supported by surging commodities prices. The worst performing sectors this quarter were Communication Services (-11.9%), Consumer Discretionary (-9.0%) and Technology (-8.4%). From a size perspective, large-cap outperformed small-cap while growth stocks underperformed value.

Geopolitical events shook the globe during the quarter as Russia invaded neighboring Ukraine. While the humanitarian fallout is of greatest importance, it is also necessary to understand the economic and market impacts that stem from these destabilizing events. Perhaps the most important tensions came from accelerating inflationary pressures the conflict imposed on the Federal Reserve. The Fed had already signaled it would soon raise the Fed Funds Rate and inflation for the first two months of the year had already climbed 1.4% (not annualized). The 10-year breakeven inflation rate pushed toward 3% and fed fund futures pricing implied an overnight rate of 2.25% by the end of the year.

Non-U.S. Equity

The UK economy surged in January and is now back above the level that existed before the COVID pandemic. An escalating COVID outbreak in China has led to some local lockdowns and is cutting into economic growth forecasts. Russia's invasion of Ukraine led MSCI to reclassify the Russian equity market from Emerging to a Standalone Market since Russian equities are currently uninvestable.

Fixed Income

The U.S. Treasury yield curve was up across all maturities during the quarter but most sharply in the intermediate range, with pronounced flattening further out the curve. The 2-year Treasury was up 160 basis points to 2.34% while the 10-year Treasury yield also ended the quarter at 2.34%, up 83 basis points. The now nonexistent spread is as low as it has been since August 2019. The Fed raised the overnight rate off zero by 0.25% at their March meeting. Through the Fed's "dot plot," it is messaging that the current intent is for additional increases totaling 150 basis points before the end of 2022.
