

ECO CONVERSION ANALYSIS/ESTIMATE REQUEST

IMRF Form 6.38 (Rev. 03/2010)

As an ECO participant (Original or Revised Plan), you may convert Regular or SLEP service to ECO service credit. **Certain rules apply for each Plan.** You may not need to convert all of your non-ECO service to maximize your pension. For an **estimate** of the most beneficial amount of service to convert to ECO service, please read the information below, then complete, sign, and return this form to IMRF.

Original ECO Plan

Members who joined ECO from **June 27, 1997 until January 25, 2000.**

Conversion of existing service credit

An Original ECO plan member may convert any IMRF service credit to ECO service credit.

If you previously took a refund

If an ECO plan member previously earned Regular or SLEP service credit but forfeited that service by taking a refund, that service may be re-established as ECO service.

To do so, the member would have to participate in IMRF or a reciprocal retirement system for two years after the date of the refund, then repay the refund. *A SLEP member may be eligible to reinstate the refund immediately.*

Understanding Salary/ECO Final Rate of Earnings (FRE)

- A member's Final Rate of Earnings (FRE) is the salary used to calculate the amount of disability, retirement, and death benefits.
 - » Under the Original ECO plan, a member's FRE is the annualized salary payable on the last day of participation in the ECO plan divided by 12.
 - The ECO monthly FRE does not include any lump sum payments for vacation, sick leave, overtime, personal leave, etc.
 - The ECO monthly FRE does include stipends, using a monthly portion of the annual stipend. For example, an annual stipend of \$2,500 increases the monthly FRE by \$208.33.
 - » Under the Regular and SLEP plans, a member's FRE is the average of the highest 48 months within the last 10 years of service. Usually this is the average of the last 48 months of service.
- If, when a member retires, he or she has both ECO and Regular or SLEP service credit:
 - » The ECO monthly FRE will be used with the ECO service credit.
 - » The Regular/SLEP FRE will be used with the Regular and/or SLEP service credit.

Revised ECO Plan

Members who joined ECO on or after **January 26, 2000**, participate in Revised ECO.

Conversion of existing service credit

You may convert existing Regular or SLEP service credit you earned as an elected county official to ECO service credit.

(Note: you need a minimum of eight years in the same position with the same employer to be eligible for the ECO formula.)

If you previously took a refund

If you previously earned Regular or SLEP service credit as an elected county official but forfeited that service by taking a refund, that service may be reestablished as ECO service.

To do so, you would participate in IMRF or a reciprocal retirement system for two years after the date of the refund, then repay the refund. If you return as a SLEP member or as a sheriff in the ECO plan, you may be eligible to repay the refund immediately. *You may also be eligible to receive or purchase other service credit.*

Understanding Salary and Final Rate of Earnings (FRE)

- Your Final Rate of Earnings (FRE) is the salary used to calculate the amount of disability, retirement, and death benefits.
 - » Under the Revised ECO plan, your retirement FRE is the average of the highest 48 months of ECO service:
 - In the last 10 years of service in a specific office with the same county, OR
 - during the years you held a specific office (minimum eight years) with the same county.
 - » The ECO FRE does not include any lump sum payments for vacation, sick leave, overtime, personal leave, etc.
 - » The ECO FRE **does** include stipends
 - » A separate ECO FRE will be calculated for each elected county position you hold for eight years or more.
 - » Earnings based on increases in your salary in the last three months may be reduced when IMRF calculates your FRE
