#### **IMRF's IL Brokerage Commissions**

IMRF's Illinois brokerage commissions decreased from fiscal year 2008 to fiscal year 2009 due to an overall decline in total Fund brokerage commissions. Total Fund brokerage commissions fell in fiscal year 2009 due to lower trading activity and extraordinary financial market conditions.

Importantly, IMRF's Board of Trustees has adopted and implemented the following policy to increase the use of economic opportunity investments in Illinois:

"The Board recognizes that investments made in businesses operating in Illinois and in real estate and other assets in the state may contribute to an improved economic climate in the state. Therefore, where investment characteristics such as competitive rate of return in relation to the risks involved, minimum quality standards, liquidity considerations, and other investment objectives of the Board are equivalent, the Board favors investments which will have a positive impact on the economy of Illinois. However, nothing in this paragraph shall be construed to favor the foregoing of investment return in order to provide a subsidy to a particular group to the detriment of the Fund members, their beneficiaries, or their public employers."

IMRF continues to seek out and promote economic development within the State of Illinois. The IMRF policy encouraging economic opportunity investments in Illinois and the high percentage of IMRF's
