

Pension Estimate Table: Tier 1 Revised ECO

How to use this table

1. Find your ECO final monthly rate of earnings in the first column.
2. Find your years of ECO service credit (top line).
3. Your approximate monthly pension at age 55 or older will be the amount shown at the point where your earnings line and service column intersect.

For example: 15 years of ECO service credit and a Final Rate of Earnings of \$1,500 a month will provide an ECO pension of \$825 per month at age 55 or older.

You can also calculate an estimate using your actual IMRF member information through your Member Access account.

Formal pension estimate

If you are within five years of retirement, request a formal pension estimate by calling an IMRF Member Services Representative at 1-800-ASK-IMRF (1-800-275-4673).

Social Security benefits are in addition to the figures shown below.

Final Rate of Earnings (FRE)

Under the Revised ECO Tier 1 plan, your retirement FRE is the average of the highest 48 months of ECO service:

- In the last 10 years of service in a specific office with the same county
- or**
- The number of years held in a specific office (minimum eight years) with the same county

The Revised ECO Tier 1 FRE does not include any lump sum payments for vacation, sick leave, overtime, personal leave, etc.

The Revised ECO Tier 1 FRE does include stipends.

A separate FRE will be calculated for each elected county position you hold for eight or more years.

Monthly Final Rate of Earnings (FRE)	YEARS OF ECO SERVICE CREDIT												
	8	9	10	11	12	13	14	15	16	17	18	19	20
	PERCENTAGE OF FINAL MONTHLY SALARY												
	24%	28%	32%	36%	40%	45%	50%	55%	60%	65%	70%	75%	80%
AMOUNT OF MONTHLY ECO PENSION (IN DOLLARS)													
300	72	84	96	108	120	135	150	165	180	195	210	225	240
